## Customer Reviews

I love these books, but I've never seen a package that actually costs more money than buying the books individually. Count them up for yourself and don't be duped! It's several dollars less if you don't purchase the package. Having said that, these are wonderful books, particularly as the series goes on and kids love them. There are some very creative and entertaining compositions.

I love these books. I am still working on the primer level so have only just looked at these but they are definitely a level up from the primer and far more challenging. I thought maybe I was ready to kind of tinker playing from these a bit along with my primer level but I don't think so! LOL I am an older adult just learning music for the first time. I have had two lessons now on the piano and used

the primer level set of these books other than that. My next lesson will be when I feel very comfortable with everything in the primer set and have opened these to know what my questions are and where I will need help. They are well written and challenging. I have nothing to compare them to but I would recommend them from my experience with them.

I've been teaching out of the Faber Piano Adventures series for years. Keeps my students engaged and interested with fun songs they actually want to play. This series helps build a good foundation of repertoire and theory knowledge.

These have been great books for my son. He is learning how to read music as well as getting ear-training and good technical skills. He is about to complete these books and we have already ordered level 2A.

I have been teaching piano for over twenty years and have used this as my go to series. I especially love the Technique and Artistry book because the selections are easy enough to really concentrate on the artistic side of learning to play the piano. The music in all the books are pleasing to listen to and challenging for the student but not overwhelming to tears. There are many genres that can keep a student from getting bored.

This is the series that my son's piano teacher suggested we buy for his lessons. He is thriving so I guess the books are just right for him. It's nice that it comes with a certificate at the end of each book.

This series was recommended to me by a piano teacher. I bought them for my daughter who, like many children, did not approach her childhood piano lessons with enthusiasm. Now that she has a child of her own, she wants to improve her skills. The pieces in this series are interesting enough to engage an adult learner, and progress at an appropriate rate.

The "lesson" book was all messed up! It has duplicates and skipped pages. I would like to return it but says it cannot be returned.
