Lone Survivor: The Eyewitness Account Of Operation Redwing And The Lost Heroes Of SEAL Team 10

Synopsis

Four US Navy SEALs departed one clear night in early July 2005 for the mountainous Afghanistan-Pakistan border for a reconnaissance mission. Their task was to document the activity of an al Qaeda leader rumored to be very close to Bin Laden with a small army in a Taliban stronghold. Five days later, only one of those Navy SEALs made it out alive. This is the story of the only survivor of Operation Redwing, SEAL fire team leader Marcus Luttrell, and the extraordinary firefight that led to the largest loss of life in American Navy SEAL history. His squadmates fought valiantly beside him until he was the only one left alive, blasted by an RPG into a place where his pursuers could not find him. Over the next four days, terribly injured and presumed dead, Luttrell crawled for miles through the mountains and was taken in by sympathetic villagers who risked their lives to keep him safe from surrounding Taliban warriors. A born and raised Texan, Marcus Luttrell takes us from the rigors of SEAL training, where he and his fellow SEALs discovered what it took to join the most elite of the American special forces, to a fight in the desolate hills of Afghanistan for which they never could have been prepared. His account of his squadmates' heroism and mutual support renders an experience that is both heartrending and life-affirming. In this rich chronicle of courage and sacrifice, honor and patriotism, Marcus Luttrell delivers a powerful narrative of modern war.

Customer Reviews

This book is a compelling, easy read that you will find hard to put down. The first part takes you through SEAL training in Coronado, CA and gives you a deep appreciation for just how hard it is to

become a SEAL, while the second half takes you through a harrowing battle that in many ways validates just why the SEAL selection and training process is so difficult and so effective. The battle sequence in Afghanistan and its aftermath is incredibly intense. The best screen writer in Hollywood couldn't have dreamt up something more intense, moving, and awe inspiring. If they make it into a movie it will in some ways be like a Afghani inspired version of Full Metal Jacket. Reading this fills one with humility and gratitude for the sacrifice that all the members of our armed services make on our behalf, but especially for the men of the SEAL teams. All I can say is that I am very glad they are on our side. As an aside, if you enjoy books like this you should check out Bravo Two Zero by Andy McNab, an SAS operative who served in the first Iraq war. I found it highly ironic that in both cases great misfortune results from acts of human mercy that elite soldiers felt compelled to take despite the clear risk it posed to their own lives. These books should be required reading for anyone who questions the character and moral fiber of such brave men.

This book was recommended to me by someone I deeply respect. I'm not a military person so I have no basis of relativity here but suffice it to say I am proud to be an American and have guys such as this doing what they do best. I read this book in one day. Start to finish. I couldn't put the thing down. It's that intriguing. You often hear about the SEALs but never really get to hear stories (or at least I don't) about the operations they go on. Yeah, they're dangerous but that's about all you get. You hear about their training and how they've gone through hell and back and the need to prepare but you don't really understand why. Maybe that's just me being a naive civilian (I'm sure other military folks understand firsthand) but I can tell you, reading this book gave me a much different perspective on what an "operation" is. Again, I'm not a military buff. I've thought the military is absolutely something we need but this book isn't about rah-rah-rah go America, it's about the journey of one man - Marcus Luttrell - from his pre-training days, through the BUD/S training, then right on into Operation Redwing which brought him and his team into one of the most fierce battles I've ever read or heard about. This story makes you want to cheer and cry at the same time. I turned the last page and was awestruck. Proud to be part of a country where Service, Loyalty, Honesty and Integrity still mean something and that we have a duty to thank and remember our military service members. Coming face-to-face with Taliban and having to survive - sometimes with a bit of luck (maybe this is a higher power watching down, who knows) - six days in the backcountry, seeing your team members KIA, I can't even imagine it. Marcus Luttrell and his fallen comrades deserve every ounce of respect, including those still serving. For those reading this, should you buy this book? Absolutely. I can say without a doubt it's a nail-biting, page-turning, harrowing experience

that I think every person should read. Doesn't matter which side of the political fence you sit on, all political BS aside, everyone should read this - it's a perspective that only comes from someone who's experienced it firsthand. No one likes war and reading this isn't about agreeing or disagreeing with Iraq, Afghanistan or the wars to come, it's about understanding what it takes to do what it takes to survive, to never give up, to have the courage and strength both physically and mentally to do what you have to do. Sometimes we get caught up in our own little battles in our own little world but all it takes is something like this story to really give you a true perspective on things. Turning the last page (and seeing the pictures at the end, and I wish there were more of them), made me reaffirm that my family, wife and kids are the most important things in my life and that I love this country. We fight because there are those who will try and take it away if we don't. Never give up. So, now that I've stepped off my soapbox, would I buy this book. Oh yeah I would.

This book takes you inside the Navy SEALs training program in Coronado. You are with Marcus Luttrell throughout BUD/S and Hell Week. You fly with him and his teammates in a C-130 to the Hindu Kush, where the hunt begins for bin Laden's right-hand man. But then it all goes terribly wrong, up there in the mountains of Afghanistan. This book, written by Patrick Robinson, reads like a fast-paced thriller, told in Marcus's understated voice. It is a rivetting, important, sad story of lost friends, valor, courage and the intricacies of modern war. It is an important book, destined to become an American classic.

Apparently some people are upset because Luttrell has an opinion and some attitude. I'll let you in on a little known secret...one does not survive any severe challenge without strong opinions and attitude. It is part of the man, therefore a required part of "his" story. Even if you still have your John Kerry bumper sticker still super-glued to your car and you truly believe in the vast right-wing conspiracy, you should buy this book for what it is, an amazing (and true) story and a great read. Stop pushing the liberal or conservative agenda for awhile and just be an appreciative American. Luttrell is the real deal.
