## Customer Reviews

Last night we had a few friends over to do some coloring, and we all agreed that this is the best coloring book we've seen in a long time. It's simply hilarious. We've had an absolute blast with this book. If you're into adult coloring books, or if you're an adult who colors, or if you simply have a sense of humor -- then I think you'll enjoy this rather playful yet profane coloring book. Each page is punctuated, shall we say, with a particularly bawdy exclamation. And they just keep on giving. For many of us, coloring is a restorative practice: You sharpen the colored pencils, turn to a new page, devise a plan, and start filling in the empty spaces. Coloring was once relegated to childhood exclusively, but it's been recovered for adults in recent years -- and it's really quite wonderful. Voids become whole and complete, in coloring. And in coloring, simple accomplishment is restive. Whereas stress often overtakes us in daily life, with coloring it's all about flow, ease, and restful thinking. Color as much or as little as you like, as there are no grades in coloring. Technical point: For avid coloring book fans, the patterning in this book has a bit to be desired. As a coloring book, I've seen better patterning. The pages are not what's called "full bleed," for instance, which means that the edges of the coloring patterns all end with open/white space at the margins. Furthermore, some bounded areas go on and on within the patterns, making you have to decide where to stop coloring -- when solid lines often do that. Furthermore, as you can see in my pics, much of what is typically black line is in fact grayscale in this book. But with that all said, it's still a great book. I can't fault it for these technical failings, as it's so creative.
