## Customer Reviews

It's a stupid little 20 page 'book' with short two paragraph entries for each 'topic'. The stupidest information is in here. "You'll want to water your plants." and "You'll need lights if you plan to grow inside." Literally, the Snoopy and Charlie Brown version of this book.

Amazing tips, really informative and straightforward. Perfect for beginners. I would recommend this book for growers and people who are just curious, there are excellent gardening tips and information about hydroponics as well.

This book is a total waste of money. I learned you need sunlight, water and nutrients to grow plants. It takes 40 minutes to read, AND it has typos. I would be embarrassed to have my name on it.

please don't buy this book, nothing to look at here. move on to a better book.

It's almost fall, so not the planting season but a good time to learn and possibly dream. A short,

straightforward, and organized presentation of the material. No pictures, drawings, or index.
